Yes. I'm from a big family. There are three generations in my family—my grandparents, my parents, my baby brother and me. My baby brother is only six months old and he's very cute.

I think my father is the one that I'm most like.

Well, there isn't anyone very famous in my family.

West says that tarantulas have been misrepresented as deadly in horror movies, so most people think they're creepy and dangerous.

West loves tarantulas, so he was probably happy and excited to have one on him, even though

he was cautious of the hairs on the spider's abdomen.

Stay calm and let the tarantula crawl down from your arm to the ground.

On the one hand, the ears don't require all of the blood vessels that the rest of the organs in the human body require. Therefore the ear is one of the easier organs to start with. On the other hand, ears have a complicated shape. The first step is to create a shape that looks real. Special wire is needed to make the metal support structure for a scaffold. Also, it's important to create the inner part of the ear correctly so that hearing will be possible. Therefore the ear is not a simple organ to start with.
